

Mainsheet Track Mounting Guide

A user's guide for the mounting of the end controls and running the control line

1. Start point, tie a stopper knot on the opposite side from where the control will be lead
2. Feed the control around the lower sheave on the traveller
3. Feed the control line around the lower sheave on the end control
4. Back to the upper sheave on the traveller
5. Finally, through the upper sheave on the end control
6. Take the loose end and repeat the operation on second side but in reverse.
